

Board Certification Program

Stand out from the crowd by validating your expertise

Understanding and mastering a product that drives incredibly potent and far-reaching transformation within an organization requires expertise. Designed to showcase this high-level of knowledge, the Board Certification Program exists to formally recognize your ability as a Board user.

With two levels of accreditation, taking you from Practitioner to Professional, stand out from the crowd with a certified badge showcasing you have the skills requisite in using the #1 Decision-Making Platform with authority and pioneering digital transformation solutions.

What does being Board Certified mean?

Validate your knowledge

The Board platform has a wide range of capabilities covering multiple types of business process. Check your knowledge in all of the key areas by taking our certification tests.

Differentiate yourself

There are many skilled Board consultants out there. Stand out from the crowd by achieving certified status, helping others to recognize that you have the skills required to deliver excellent project results.

Gain project priority

We're always searching for the best talent to implement our transformative projects. Help to put yourself in prime position for project allocation with a certified badge.

Which level is right for me?

There are two levels of certification to work towards. Attaining each one signifies your understanding and experience of the Board platform to a certain level; from a familiar user (Board Practitioner) right up to a master of the solution (Board Professional).

Board Practitioner

The Board Practitioner level of certification is perfect for those who are newer to the Board platform.

A core understanding of the product and its underlying technology, familiarity with the different elements and options, and the ability to execute simple tasks are what it takes to achieve the Practitioner badge.

Achieved through:

Online Exam

(1 hour, multiple choice)

Board Professional

The Board Professional badge is reserved for those who have mastered, with experience, the three main elements of Board delivery: data, visualization, and process. You'll need a Practitioner badge, hands on experience, as well as sound knowledge of areas such as data modeling, the Board architecture, the possibilities of the visual UI, and best practices in business processes.

Achieved through:

Online Exam

(2 hours, combination of multiple choice and open questions)

Knowledge Evaluation Interview
