

Enhancing supply chain resilience with Board Intelligent Planning

With demand volatility increasing, product proliferation returning, and supply uncertainty growing, supply chain leaders need an Intelligent Planning solution that provides the real-time insights needed to drive productivity. Board's Intelligent Planning Platform enhances the responsiveness and resilience of your supply chain, no matter the size or complexity. Here's why Intelligent Planning is crucial in today's turbulent supply chain environment.

Many supply chain leaders lack the ability to plan intelligently

Visibility Challenges

Only

29%

of companies can see the impact of decisions on total cost¹

Management Challenges

93%

of decisions are still made using spreadsheets1

of companies feel that processes are balanced between the needs of commercial and operational teams¹

Orchestration Challenges

Only

of companies have implemented scenario planning in supply chain²

of companies actively model the form and function of inventories¹

Less than

of companies have developed clear governance for the organization on how to use technology to make better decisions¹

There is an opportunity to boost supply chain resilience

Companies with digital dashboards for end-to-end supply chain visibility are 2x as likely to avoid supply chain problems caused by disruption¹

Companies that have implemented scenario planning are 2x as likely to avoid supply chain challenges²

quality are **1.5x** more likely to report no challenges from supply chain impacts²

Top priorities for

And momentum is gathering...

Demand Planning 74%

 Supply Planning 69% • Inventory Optimization **58%**²

digital investment are:

Buffers are Network needs to dormant nodes Structural reconfigure within the network

working smarter, managing uncertainty

variations in volume and mix.

and sits at the heart of a resilient supply chain

Board Intelligent Planning enables this transformation

of the supply chain changes, can the system change?
