

# Strategic & Long-Term Planning

## From strategy to execution — plan your long-term with confidence.

### Reduced risk exposure:

Model scenarios to identify risks and ensure business continuity.

### Improved agility:

Adjust long-term plans instantly as markets and assumptions shift.

### Value creation:

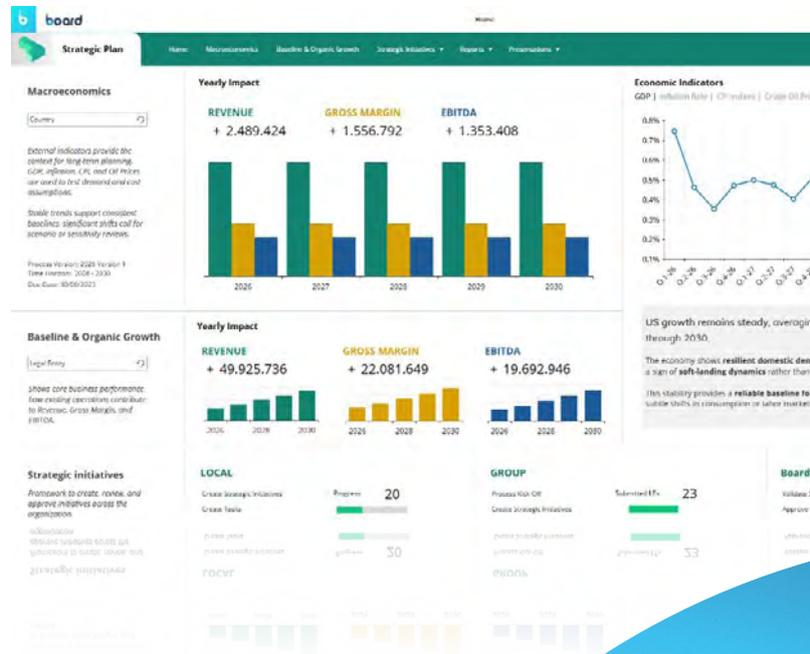

Tetra Pak enhances strategic decision-making through unified, forward-looking planning.

Board empowers finance leaders to align strategy with performance — combining internal planning with market foresight for faster, smarter, more resilient long-term planning and confident decision-making.

## Align strategy, finance, and operations for sustainable growth.

Board's Strategic & Long-Term Planning helps CFOs and finance teams connect multi-year strategies to actionable financial and operational plans. Model long-range scenarios to assess market shifts, M&A, or CAPEX impacts and simulate best-, worst-, or expected outcomes in real time.

With insight from Foresight and Signals and automated analysis from the FP&A AI Agent, finance leaders can evaluate scenarios, manage uncertainty, and ensure every strategic initiative is both measurable and adaptable to change. The result is a clear roadmap that balances ambition with financial discipline, improving agility and decision quality across the enterprise.

## Key benefits

### Holistic alignment

Integrate strategic, financial, and operational plans with external intelligence for unified, forward-looking direction.

### Predictive insight

Use scenario modeling, what-if analysis and Board Foresight to anticipate risks and opportunities before they emerge.

### Agile planning

Adjust long-term forecasts dynamically as Board Signals reveal changes in business drivers and market trends.

### Cross-functional collaboration

Break silos between finance, operations, and strategy teams with shared internal and external data context.

### Resilient growth

Drive sustainable performance through informed, data- and intelligence-driven strategy.

## A comprehensive range of capabilities

### Scenario modeling & forecasting

Simulate multiple long-term outcomes using real-time business and market data.

### Predictive analytics

Leverage market intelligence from Foresight and Signals to assess risks and identify strategic opportunities early.

### Collaborative planning

Engage all stakeholders around shared insights for cohesive strategy development.

### Variance analysis

Use the FP&A AI Agent to evaluate deviations and adjust initiatives based on internal metrics and external indicators.

### Performance tracking

Monitor long-term KPIs and objectives enriched by external benchmarks with support of the FP&A AI Agent.

### Integrated planning

Align corporate strategy with financial and operational plans informed by latest market intelligence.

## Board Delivers Value

Board transforms strategic planning from static forecasting to dynamic strategy execution. With market insight from Foresight and Signals and in depth analysis from the FP&A AI Agent, finance leaders can evaluate scenarios, manage uncertainty, and align initiatives with internal goals and external realities — ensuring long-term performance.
