

Management Reporting and Analysis

From data to decisions — connect reporting with performance

Reduced workload:

Automate report creation and data collection across systems

Faster insights:

Deliver real-time access to critical business metrics

Empowered users:

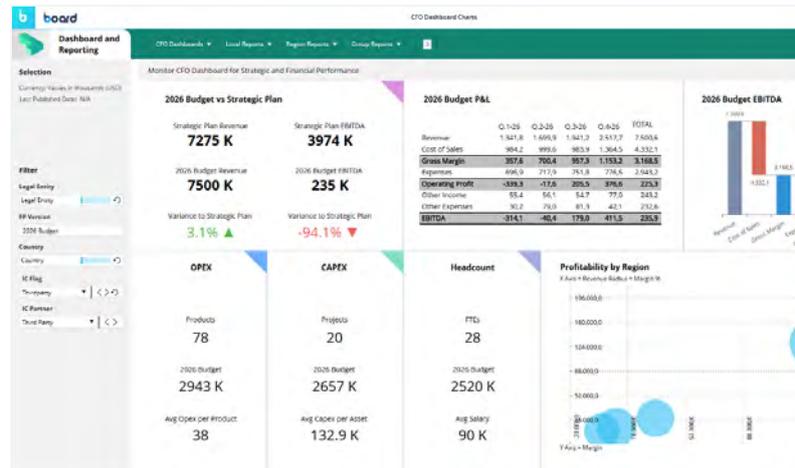

The Cheesecake Factory improved speed and flexibility in finance reporting

Board helps finance teams modernize reporting and analysis, delivering accurate, real-time insights that drive faster, more informed and confident business decisions.

Board's Management Reporting & Analysis solution unifies data from multiple financial, operational, and external sources into a single, trusted platform.

Finance teams can automate report generation, track KPIs, and visualize performance in real time, eliminating manual work and fragmented tools. Dynamic dashboards and predictive analytics and the FP&A AI Agent empower users across finance, FP&A, and business units to surface anomalies, explain variances, and explore data independently.

With self-service access and continuous data updates, CFOs and their teams gain complete visibility into performance, enabling faster, smarter, and more confident decisions across the enterprise.

Key benefits

Unified reporting

Connect multiple systems into one reliable source of truth.

Real-time insights

Access up-to-date data for faster, more accurate decisions.

Self-service access

Empower users to analyze and drill down independently.

Visual clarity

Create tailored dashboards for executives and analysts alike.

Smarter analysis

Leverage predictive analytics for forward-looking decisions.

A comprehensive range of capabilities:

Unified data collection

Combine finance, operational, and external data sources.

Streamlined reporting

Reduce time and effort required to generate and distribute reports.

Understand performance

Leverage the FP&A AI Agent to uncover margin trends, anomalies, and performance drivers across business units.

Interactive dashboards

Visualize key metrics with dynamic, user-friendly interfaces.

Predictive analytics

Identify risks and opportunities proactively.

Collaborative analysis

Enable teams to share insights and align actions.

Board Delivers Value

Board transforms management reporting and analysis from reactive data gathering to proactive insight generation. By combining data integration, visualization, predictive analytics, and support from the FP&A AI Agent, finance leaders can deliver faster insights, enhance transparency, and empower decision-makers with the clarity to act on performance in real time.
