# Disclosure Management for the Modern Enterprise

## Accuracy and speed are critical

**90%**
reduction in reporting errors

**30%**
reduction in total reporting time

**FAST**
and frictionless filings, every single time

Board proudly partners with IRIS CARBON® to enable seamless collaboration, break down operational silos, and cut administrative burden - empowering you to publish and file finished reports with confidence.

## Last-mile reporting, minus the last-minute stress

Disclosure Management for Board streamlines the creation, review, and filing of regulated and management reports. Teams author directly in Microsoft Word and Excel, collaborate with role-based workflows and version control, and produce EDGAR/ESEF-ready and inline XBRL (iXBRL) outputs — all in a secure, cloud workspace. Produce 10-K/10-Q (EDGAR), Annual Reports (ESEF iXBRL), MD&A, board packs, investor decks, ESG and other narrative disclosures – with ease.

With compressed timelines and stricter SEC/ESMA standards, copy-paste workflows invite risk and rework. Connect narrative to an approved single source of truth to stay synchronized and accelerate sign-off.

### Data Sources

**board** | ERP/HRMS Systems | Other Sources

### Collaborative Reporting Ecosystem

**Teams**
- Finance
- Admin
- Accounting
- Legal
- Design

**Workflow Collaboration**
- Document Authoring
- AI-Powered Workflows
- Interactive Dashboards
- User Access Control
- Version Management
- Audit Trails

**Review & Approve**
- Review & Sign-off
- XBRL Tagging

### Standardized Reports

**Financial Reports**
- Annual reports
- Interim reports
- Quarterly reports
- Press releases
- XBRL / iXBRL

**Non-Financial Reports**
- Management reports
- Corporate presentations
- Board / budget books
- Quarter executive briefings

## Key benefits

**Faster reporting cycles**
Streamline data from consolidation to disclosure

**Stronger compliance**
Keep every figure accurate and regulator-ready

**Seamless collaboration**
Connect finance, accounting, and legal teams

**Greater control & confidence**
Improve transparency and reduce reporting risk

# Primary capabilities at a glance

## Office authoring
Create in Word/Excel with controlled data links, roll-forward, and track-changes.

## Collaboration & workflow
Role-based permissions, reviews/approvals, comments, version control.

## XBRL/iXBRL
Inline tagging, taxonomy management, SEC EDGAR/ESMA ESEF validations to cut filing risk.

## Filing readiness
Pre-submission checks and regulator-ready packages for EDGAR/ESEF.

## Board data sync
Seamlessly pull approved numbers from Board to keep narrative aligned with actuals, eliminations, FX, and adjustments.

## Audit & controls
End-to-end audit trail with timestamps, version history, task tracking.

# Easy process

Connect approved data from Board (consolidated BS/IS/CF and notes) to Word/Excel narrative sections, then compose collaboratively with section ownership, deadlines, and routed reviews/approvals. Tag and validate with iXBRL against the chosen taxonomy, resolve issues via guided checks, and publish regulator-ready EDGAR/ESEF outputs—maintaining a complete audit trail throughout.
