

Procurement Planning Solution

THE FUTURE OF PLANNING

Procurement Planning Solution

Enabling Accurate and Efficient Procurement through Integrated Workflows

Our solution accelerates project adoption, leveraging 8 years of experience in structured procurement planning. It **shortens the analysis phase and overall project timeline** by leveraging a consolidated, easily customizable data and process model. The process is broken into self-contained steps, using interactive mock-ups to show how users engage with the system.

This approach helps plan purchase needs more accurately and in advance, generating a consistent procurement plan. It also promotes active collaboration between Procurement and Finance, using the budget and business plan as guiding tools for planning.

THE MARKET CONTEXT

Why Procurement Planning is a Business Imperative

Organizations are navigating an era marked by volatility, supply chain disruptions, regulatory complexity, and rapid technological change. Traditional procurement processes, often reactive and fragmented, are insufficient to meet these modern challenges. Without robust procurement management, companies face:

- ! **Unpredictable costs and budget pressure**
- ! **Risk management and operational continuity**
- ! **Fragmented processes and limited visibility**
- ! **Need for lean procurement teams**

Design and Key Capabilities

SDG's Procurement Planning Solution streamlines workflows, leverages AI forecasting, simulates scenarios, and integrates systems to optimize procurement and align with budgets. Its key features include:

Spend & Planning Insights:

proactively monitor trends and measure planning accuracy

Collaborative Workflow:

units submit purchasing needs, procurement consolidates

Scenario Planning:

simulate multi-scenario purchasing plans

Process Analytics & Bottleneck Detection:

identify critical issues in procurement

AI-Powered Planning:

strategic sourcing, recurring procurement and capacity planning

Integration & Budget:

link e-procurement, ERP & AFC for multi-year planning

PLATFORM ENABLEMENT

Building on Robust Technology with SDG

Our Purchasing Planning Framework is designed to be deployed on leading platforms like Board, ensuring end-to-end integration, scalability, and user adoption.

Through the power of in-memory analytics, role-based workflows, and real-time simulations, the platform delivers:

Collaborative Planning

Dynamic Dashboards

Advanced Analytics Integration

Expert-curated External Data

Frictionless Planning Process

Value to the Client

Turning Procurement Planning into a Strategic Asset

Deploying the SDG Procurement Planning Solution means transforming your process into a source of competitive advantage. **Key benefits** include:

Scale Up: maximize economies of scale

Team Synergy: boost procurement–unit collaboration

Smooth Workload: balance peaks for procurement staff

360° Insights: full process visibility + KPI analysis
