ESG/CSRD Reporting

Unified ESG data collection and compliant CSRD reporting

Time savings:
Automate ESG data collection and reporting workflows

Increased accuracy:
Ensure consistent, auditable ESG data across all entities
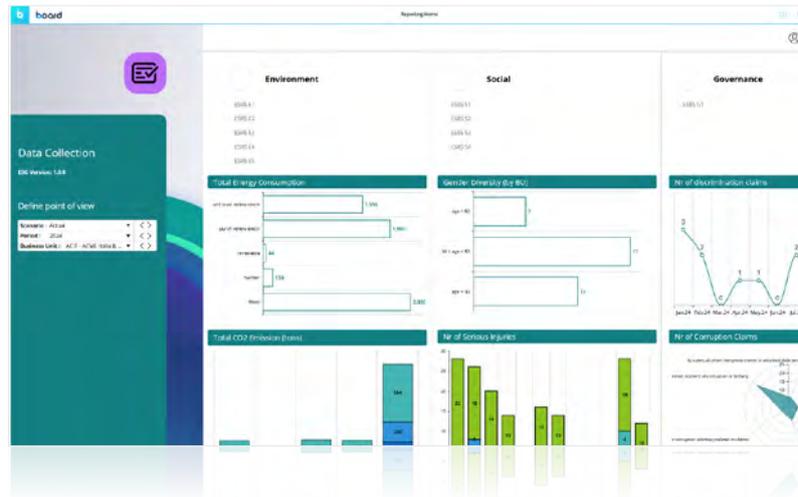

Aligned with finance:
Support CSRD-aligned data structures and emission calculations

Board enables sustainability, finance, and compliance teams to collect, validate, and report ESG and CSRD data accurately, consistently, and with full auditability.

Ensure compliant, auditable ESG & CSRD reporting across the enterprise

Board's ESG/CSRD Reporting solution centralizes sustainability data collection and applies structured workflows to ensure accuracy, traceability, and compliance with CSRD requirements. Teams can automate ESG data capture across entities, validate environmental, social, and governance metrics, and perform carbon emissions calculations in line with regulatory expectations.

Audit trails, configurable processes, and integrated disclosure controls strengthen data integrity from source to report. The Controller AI Agent enhances data reliability by detecting inconsistencies, validating taxonomy mappings, and recommending corrections across ESG submissions. Real-time dashboards provide unified insights that support planning and improve sustainability performance tracking.

Key benefits

Reliable compliance

Ensure adherence to CSRD requirements with structured and auditable workflows

Consistent ESG data

Standardize data capture across entities for accuracy and assurance

Operational efficiency

Automate sustainability reporting to reduce manual work and errors

Integrated disclosure

Connect ESG data directly to narrative reporting processes

Real-time visibility

Monitor sustainability metrics and performance with unified dashboards

A comprehensive range of capabilities

Structured ESG data collection
Centralize sustainability inputs across all contributors.

Workflow automation
Track submissions, approvals, and audit trails.

CSRD compliance framework
Apply CSRD taxonomy, structure, and data definitions.

Carbon emissions calculation
Calculate and validate emissions using standardized logic.

Entity-level consistency checks
Detect anomalies, missing values, and mapping errors.

Disclosure-ready outputs
Integrate with Disclosure Management for seamless reporting.

Board Delivers Value:

Board elevates ESG and CSRD reporting by ensuring complete data integrity, auditability, and regulatory alignment. Automated data capture, workflow governance, and intelligent checks from the Controller AI Agent minimize risk, enhance transparency, and help teams deliver accurate, assurance-ready disclosures across all ESG dimensions.
