Tax Reporting

Automate tax reporting end-to-end with confidence

Guided process:
Standardized workflows ensure consistency and control across entities.

Out-of-the-box compliance:
Preconfigured rules accelerate ETR, CbCR, and Pillar 2 adherence.

Aligned with finance:
Financial and tax data stay synchronized in real time.

Board enables tax and accounting teams to simplify tax reporting, automate ETR calculations, and ensure compliance across OECD Pillar 2, CbCR, and local regulations.

Deliver accurate, compliant tax reporting with streamlined data control

Board's Tax and Statutory Reporting solution automates tax data collection, validation, and reconciliation across entities. Teams can manage deferred and current tax exposures, calculate effective tax rates (ETR), and perform dynamic scenario evaluation aligned with planning cycles.

Preconfigured rules support OECD Pillar 2 requirements and Country-by-Country Reporting (CbCR), while workflow and audit-trail capabilities make it easy to track progress and ensure accuracy. The Controller AI Agent automatically detects inconsistencies, validates tax mappings, and recommends corrections to improve compliance and data quality.

With real-time visibility and seamless integration with financial data, organizations can deliver timely, reliable, audit-ready tax reporting.

Key benefits

Consistent tax reporting
Standardize tax packages and data collection across all entities

Regulatory compliance
Support OECD Pillar 2, CbCR, and local tax rules

Accurate ETR calculation
Automate deferred and current tax assessments reliably

Audit-ready transparency
Gain full visibility into workflows, adjustments, and approvals

Integrated alignment
Synchronize tax data with financial and planning processes

A comprehensive range of capabilities

Tax data collection & validation
Streamline inputs, mappings, and checks across entities.

Workflow & audit trail
Track progress, approvals, and changes for full transparency.

ETR calculation & scenarios
Evaluate tax exposure under varying assumptions.

Pillar 2 compliance
Automate calculations and reporting for OECD requirements.

CbCR reporting
Produce accurate, structured, audit-ready country-level disclosures.

Financial integration
Align tax and financial master data in real time

Board Delivers Value:

Board transforms tax reporting from manual, spreadsheet-driven work into an automated, compliant, and transparent process. With unified tax data, preconfigured regulatory rules, workflow governance, and intelligent validations from the Controller AI Agent, organizations can ensure accuracy, accelerate reporting cycles, and confidently meet global tax requirements.
